

PROTO-1 MANUFACTURING LLC

TUBE END FORMING MADE EASY

Proto-1's product line of rotary end forming has versatile capability to manufacture multiple end forms at once. With tooling that is designed and built in-house, you can count on a repeatable process to produce consistent parts. Proto-1's line of rotary end forming can form parts from 0.5" - 18" diameter. Our in-house engineering staff can customize any part of your project to meet your needs. Our rotary end form machines are industry leading in both tube end forming and tube cut-off.

TUBE CUT-OFF DONE RIGHT

Using a cold saw to cut tubes? Proto-1's cut-off technology can deliver a faster cleaner cut. Our technology has the ability to perform cut-off after bend. Proto-1 has also developed a double cut-off process that minimize scrap and maximize your production process. Our tube cut-off serves multiple industries and can be used on various materials. Improve your cut-off process today and contact us!
